

SEMINÁRIOS iBB

Anfiteatro FA.1 (Pavilhão Informática) e Sala 0.65 (IST/Taguspark)*

13h – 14h

14 Outubro 2019

Teresa Esteves

Biomimetic adsorbers: adenine functionalised and imprinted polymers

Margarida Palma

*Isolation and selection of *Saccharomyces cerevisiae* and non-*Saccharomyces* strains for enhancement of desirable flavors in beer fermentation*

11 Novembro 2019

Carla Carvalho

Applying bacterial survival strategies to develop bioprocesses

Dalila Mil-Homens

*New insights into the autotransporter secretion system: modulation of *Burkholderia cenocepacia* infection and host-pathogen interactions*

9 Dezembro 2019

Teresa Silva

Organoids as model for studying cerebellar dysfunctions

Joana Feliciano

*A galaxy of noncoding RNAs and RNA-binding proteins in the opportunistic pathogens of the *Burkholderia cepacia* complex*

20 Janeiro 2020*

Bruno Pedras

Luminescence-based oxygen/temperature sensors: from aeronautical to intracellular applications

Ana Fernandes-Platzgummer

Scalable production of adult stem cells and their derivatives in dynamic Culture Systems
